## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/19/03 has been entered.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art (APA) in Fig.6 in view of Gerrans, Jr. (US 5,885,108).

Applicant's admitted prior art discloses substantially the claimed invention except for the continuously reduced portion. Gerrans teaches a molded portion (16) wherein a circumferential size of the molded portion from a part corresponding to the terminal connecting portions is continuously reduced, so that the rear end portion has a same diameter as the cable (22), and wherein there is no increase in the circumferential size of the molded portion in a direction parallel to a direction in which the terminal fittings extend in order to provide a smoother gripping on the molded portion. Therefore, it

Art Unit: 2833

would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the molded portion of APA being continuously reduced, as taught by Gerrans, to provide a smoother gripping on the molded portion.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's APA in Fig. 6 in view of Gerrans, and further in view of Hauchard et al. (US 4,969,845).

Applicant's APA, as modified by Gerrans, discloses substantially the claimed invention except for the plurality of parallel alternate concave grooves and convex ribs. Hauchard teaches a plurality of parallel alternate concave grooves and convex ribs (37) formed in a direction parallel to a direction that the wire (14) extends to save material while providing structural strength to the molded portion. Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the molded portion having a plurality of parallel alternate concave grooves and convex ribs formed in a direction parallel to a direction that the wire extends, as taught by Hauchard, to save material while providing structural strength to the molded portion.

### **Response to Arguments**

Applicant's arguments with respect to claim 4 and 6-7 have been considered and are moot in view of the new grounds of rejection.
